this book explores the contemporary phenomenon of forced marriage and honour killings in Britain set against a background of increasing honour based violence within the country's South Asian and Muslim diasporas the book traces the development of the honour question over the past two decades it accordingly witnesses unprecedented changes in public awareness and government policy including ground breaking honour specific legislation and the criminalisation of forced marriage all of which makes Britain an important context for the study of this now indigenous and self perpetuating social problem in considering the scale of the challenge and its underlying causes attention is paid to the intersections of gendered power structures that disadvantage female members of honour cultures as well as feminist theories that seek to explain them the book features five key case studies of honour killings and draws from a wide range of narratives including those of honour violence survivors grassroots service providers and legislators such a myriad of perspectives reveals the complexity of the honour issue and the deep ideological divisions that characterise it with the UK's multiculturalist discourse unable to reconcile protecting patriarchal minority cultures with safeguarding gender equality and human rights the book raises fundamental questions about the country's future direction following a long trend of state sponsored integrationist policies the government's response to the honour question points decisively in the direction of a post multicultural British nation

with the UK government's 2016 BIM threshold approaching support for small organisations on interpreting filtering and applying BIM protocols and standards is

urgently required many small uk construction industry supply chain firms are uncertain about what level 2 bim involves and are unsure about taking first steps towards having bim capability as digitisation increasingly impacts on work practices getting to grips with bim offers an insight into an industry in change supplemented by practical guidance on managing the transition towards more widespread and integrated use of digital tools to manage the design construction and whole life use of buildings

a green economy must be built on green jobs the kind of employment that is low carbon intended to reduce energy use and expected to restore environmental quality but attempts to define exactly what a green job is have led to varied and often contradictory answers there are many unresolved questions including whether we consider jobs in the nuclear fuel industry to be green jobs or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a dirty industry this book deals with the relationship between green concepts green jobs green economy green growth and sustainable development it examines to which extent creation of green jobs supports overall economic development as opposed to creation of elitist jobs and greenwashing in order to do so general conceptual frameworks for green jobs green economy green growth and green policy are presented as well as their implementation in ten countries selected among the group of twenty the selection includes advanced the european union the united states of america australia canada republic of korea japan and developing countries mexico china turkey and brazil the analysis presented in this book shows that although green concept is well intentioned its implementation depends on local circumstances economic political and social developed countries perceive green growth as a way to create new markets and demand while developing countries rely more on labor intensive growth and less expensive green jobs thus greening the economy does not diminish differences between rich and poor this book is suitable for those who study and work in ecological economics sustainable
